Mathematics for Machine Learning

A sequence of 3 courses on the prerequisite mathematics for applications in data science and machine learning. Successful participants learn how to represent data in a linear algebra context and manipulate these objects mathematically. They are able to summarise properties of data sets and map them onto lower dimensional spaces with principal component analysis. Finally they can solve optimisation problems and use this skill to train models for describing data such as simple neural networks.

David Dye
Professor of Metallurgy
Department of
Materials
Imperial College London

Samuel J. Cooper
Lecturer
Dyson School of Design
Engineering
Imperial College London

Marc Deisenroth
Senior Lecturer
Department of
Computing
Imperial College London

Este certificado acredita que el estudiante completó un programa en línea impartido a través de Coursera. No constituye una inscripción formal en ninguna universidad o entidad, ni otorga por sí mismo créditos académicos, calificaciones o un título. Las instituciones u organizaciones pueden, a su discreción, reconocer este aprendizaje para sus propios programas o credenciales.
